

# K & V ONLINE SHOPPING

Creators:

Vinoshia Srikugananathan | 100870082  
Kavinayan Thayananthakumar | 100820472

Course Name: Web & Script Programming  
Course Code: INFR 3120U

The project involves developing a web application that enables users to perform Create, Read, Update, and Delete (CRUD) operations on an online shopping website application. Authentication features, including user registration, login, and logout functionality, are integrated to secure access and protect actions like updating and deleting data. The application ensures a seamless and secure user experience while managing an online shopping cart system.
